

CAN Solo

Affordable, stand alone applications for TV news.

Overview:

- Perfect for individuals or small groups who are producing a television show or just writing scripts.
- All applications run on both Macintosh and Windows operating systems.
- Unicode savvy, works in any language the OS supports.
- Stand alone apps provide some ability to interchange files, but please consider CAN NCS for a true multi-user server based system.

CAN Script: Script Window in Windows XP

Modules:

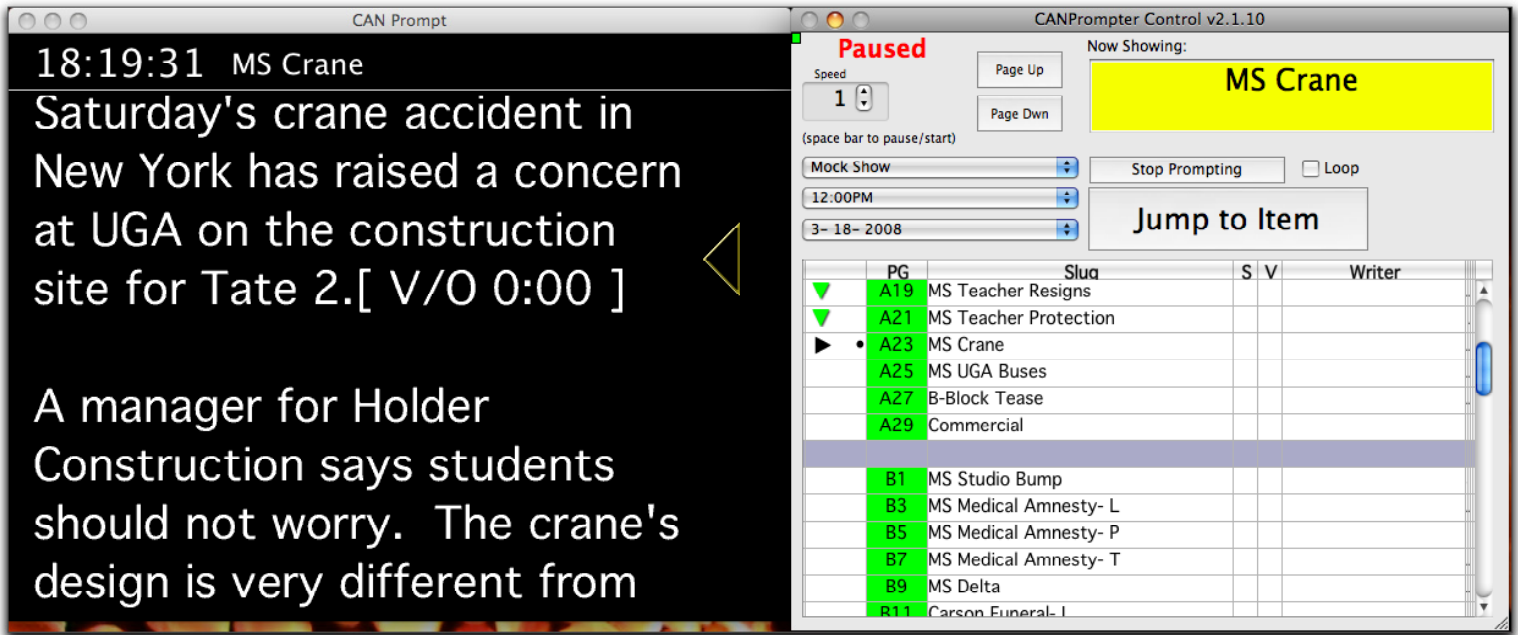

- CAN Script: True two column television script writing. Spell checking (OSX). Thumbnails of video elements.
- CAN Rundown: Show timing and management.
- CAN Prompter: Script/show teleprompting. Multi screen display. Change running order while prompting.

CAN Rundown: in Mac OS X
